

MURTHI NIRNAYA • VEDIC JYOTISH

Why same Shani transit gives different results?

Annant Drishti Adhyatam Peetham • Satyamshakti Bhudevi

The problem with general Rashi phal

SAME TRANSIT • SAME MOON SIGN

Person A: Shani in 8th → Promotion

Same Saturn, same Rashi. Astrology says difficult, but he rises. Classical Gochara alone cannot explain this divergence.

SAME TRANSIT • SAME MOON SIGN

Person B: Shani in 8th → Job loss

Same Saturn, same Rashi. Astrology says difficult, and it was. Two destinies, one transit — why?

General predictions are incomplete without qualitative refinement

CORE PRINCIPLE

What is Murthi Nirnaya?

Murthi = Form of manifestation

1

Not an idol of God

Murthi here means the metallic form a planet assumes at the moment of Rashi Pravesh to deliver results.

2

Decides HOW effectively

Transit house may be same, but Murthi decides the quality, strength and ease of the result.

3

Preserved in classics

Documented in Muhurta Chintamani, Manasagari & traditional Panchanga for Saturn & Jupiter.

Graha assumes a metal to speak

Same planet, same sign, different voice — depending on Moon at ingress.

Shloka: Janma-Rasheh Sthite Chandre Grahasya Phala-Nirnayah — The quality of transit is determined by Moon from natal Moon at ingress.

DESCENDING AUSPICIOUSNESS

The 4 Murtis

Swarna → Rajat → Tamra → Loha. Same planet, different metallic voice at Rashi Pravesh.

How to calculate your Murthi?

1

Note your Janma Rashi

The sign where natal Moon sits. Not Lagna, not Sun sign. e.g., Moon in Vrishabha = Taurus.

2

Note planet's Rashi Pravesh date

The exact day when Shani / Guru enters a new sign. This is your anchor date.

3

Check transiting Moon from Janma Rashi

On that ingress day, where is transiting Moon counted from your Moon? That decides the metal.

MURTHI FORMULA MAP

FROM JANMA RASHI

1st, 6th, 11th

**Swarna • Gold**

Tremendously favourable

2nd, 5th,
9th**Rajat • Silver**

Favourable, stable

3rd, 7th,
10th**Tamra • Copper**

Average, effort needed

4th, 8th,
12th**Loha • Iron**

Unfavourable, karmic test

Simple count: Always count inclusive from your Janma Rashi to transiting Moon position

Real example: Jupiter in Capricorn — same day, four destinies

Jupiter enters Makara Moon also in Makara

At exact Rashi Pravesh, transiting Moon was in Capricorn.
From your Janma Rashi, count where that Moon sits — that
decides your Murthi.

● Moon in 1st from Cap • Tr. Moon = Natal Cap = 1st house

SWARNA • GOLD

Simha • Leo

Moon in 6th from Janma Rashi

1st, 6th, 11th = Swarna

Tremendously favourable → divine help

RAJAT • SILVER

Vrishabha • Taurus

Moon in 9th from Janma Rashi

2nd, 5th, 9th = Rajat

Favourable → peace & stable gains

TAMRA • COPPER

Mesha • Aries

Moon in 10th from Janma Rashi

3rd, 7th, 10th = Tamra

Average → results after effort

LOHA • IRON

Mithuna • Gemini

Moon in 8th from Janma Rashi

4th, 8th, 12th = Loha

Difficult → endurance & cleansing

What if you have Loha Murthi?

Don't panic — check full chart first

Murthi refines, not replaces. See Dasha, Ashtakavarga, Vedha and Moon strength before final word.

Daan of metal & Chandra Shanti

Donate iron / black til on Shani day for Loha, strengthen Moon — water to Shivlinga, meditation.

Ishta Devata puja for the planet

Vishnu Sahasranama for Jupiter Loha, Hanuman / Shiva for Saturn Loha — bhakti shifts metal.

Strengthen Moon — the deciding planet

Since Murthi depends on Moon, calm mind: Om Chandraya Namah, jal abhishek, breathwork.

Remember: Loha = endurance & karmic cleansing, not destruction. Iron makes you earn it through discipline.

Diya • Daan • Dhyan

Light restores clarity — remedy is alignment, not fear.
